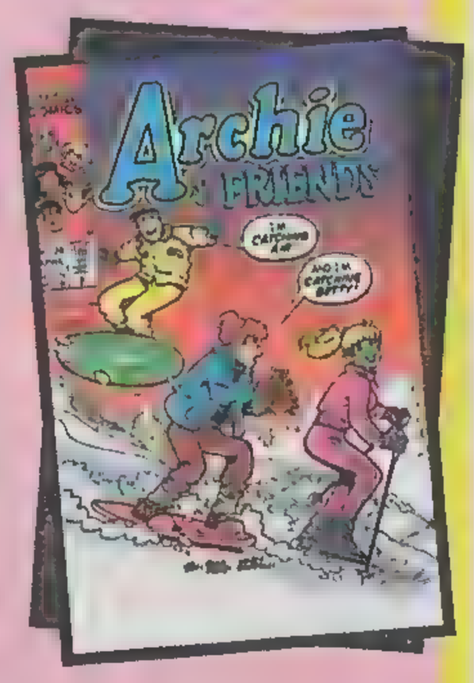
EDITOR'S NOTEBOOK

Dear Archie Readers,

I'm sure many of you out there are pet owners. If you are, then you can appreciate the problems that occasionally pop up. For example: Your family is going on vacation and you can't take "Sammy" your pet poodle. Grandma and grandpa won't watch him. Your friends already have dogs or cats, so they're not available to dogsit. Well, there's always the kennel. I used to leave my dog at a very nice kennel when I'd go on vacation. My dog loved it. Why not?! It cost more for the dog than my vacation. She'd be groomed every day, fed specially cooked meals and taken for a walk whenever she wanted to go.

You'd think there would be a simple solution for people who want to have a cute, cuddly pet and at the same time not worry about someone watching it. Well, we're coming close to the turn of the century, so new "pet" technology just might be the answer. In fact, it seems that Veronica has solved this problem when she asks "daddy" to buy her a "robotic dog." However, what Veronica and her dad do not know, is that this puppy is the front for a very clever burglary ring. Will klutzy Archie, along with genius Dilton, sweet Betty and the ever-hungry Jughead, be able to save the wealthiest family in Riverdale from a computerized canine caper? Don't miss "Pets for Sale" next month in ARCHIE & FRIENDS #28 APRIL.



For those of you who want to add a little magic to your everyday routine, set your sights on SABRINA #12 APRIL. If you've ever thought about love potions for that special someone who's always ignoring you, see what happens when Sabrina's aunts use some of her special mix instead of perfume. How this potion works is, once you put it on, you fall in love with the first person you meet. See any possibilities for some humor here? This issue is not going to magically disappear. It's going to sell out. So get your copy while the getting is good.

The Cooper's Hawk

The Cooper's hawk's body is crow sized. It has a long tail, short round wings, sharp talons and a hooked beak. The adults have dark caps on their heads and the babies have a light coat of white down. The Cooper's hawk usually lives in deciduous (shed their leaves) trees and not in coniferous trees (cone-bearing like pines). The nest is from 25-65 feet off the ground and they try to use the same nest as the previous year. The hawk spends its summers in areas from Central North America to British Columbia, and its winters from the Southern United States to Northern Mexico. The male Cooper's hawk makes 2 - 3 nests of sticks and the female lays 3-6 eggs of a blue-green, creamy white color. The Cooper's hawk feeds on birds, small mammals and insects.

Fun House Mirrors

Have you ever wondered why you look so funny in those fun house mirrors or what makes you look that way? Well, since the mirror is curved, the light bounces in another direction. If it was a flat mirror, the light would bounce in exactly the same direction. This causes it to produce the same image. That is how fun house mirrors work.
